# hw1

### 1.9 5'

No, natural language is ambiguous, but algorithms require definiteness. 理由合理即可

## 1.11 9'

- Definiteness
- Effective computability
- Finiteness 各举一反例,每个3',合理即可

## 1.16 9'

任选3,每个3' Examples:

- opcodes
- data types
- addressing modes
- memory address space

### 1.18 10'

One, many 理由合理,每个5'

#### 2.8 12'

- a. 01111111 127
- b. 10000000 -128
- $\mathrm{c.}\ 2^{n-1}-1$

d.  $-2^{n-1}$  每个3'

## 2.14 15'

- a. 1100
- b. 1010
- c. 1111
- d. 1011
- e. 0000

每个3'

## 2.22 10'

正+正=负/负+负=正任选即可

## 2.24 10'

最高位进位即可

### 2.27 8'

正常的全加结果,但是发生了溢出 YES/NO都行说清楚情况即可

## 2.34 12'

- a. 0111
- b. 0111
- c. 1101
- d. 0110

每个3'
